**COMMUNITY SERVICE:**

I am a firm believer in the power of mentorship to sculpt lives. Prior to medical school I was heavily involved in inner city outreach programs, coordinating two non-for-profit programs: Enriching the Lives of Kids Society and Redman Caravan. These programs provided inner city kids mentorship and engagement in sports or drama respectively, facilitating to get them off of the streets and motivating them to excel. The development of St. Joes Pilot TV Show through APTN was a summer program developed to engage aboriginal inner city kids.

I continue to mentor young doctors and medical students through my capacity as a surgeon. In addition, I am planning to go to Haiti in May 2014 to educate local physicans in orthopaedic trauma management.

**INTERESTS AND HOBBIES:**

I was an apprentice tile setter, and love remodeling things. I play multiple sports, and love the outdoors: mountain biking, orienteering, white water rafting, kayaking, canoeing, mountain

climbing, skiing, and camping. I also enjoy spear fishing, cave diving, and rowing. I sail avidly, which is one of my passions, and ride English saddle horseback. In terms of the arts, I danced classical and modern ballet at a high level for eight years, played classical guitar for ten years, and acted for the Citadel Theatre for approximately the same duration. I love drawing, painting, and sculpting, and have had two pieces displayed at the Edmonton Art Gallery. I also love to travel and read, and speak two foreign languages: fluent Serbo-Croatian, and conversational French.
